

#### ALTAR UP TO THE YEAR 1922

The communion rail (not shown) is where the first pews now start.

The wall in the back of the Altar was painted to appear as pillars, and in the back of the wall was the school room with a folding partition making a two room school.

The partition on the left facing the Altar was a small room for the Sisters to prepare their lunch, and in the back of the partition on the right was the cloak room for the children and also used as a penance room where those misbehaving had to spend some time.
